(54) CENTER SERVER FOR MUTUAL LENDING/BORROWING SYSTEM, CONTROL METHOD THEREFOR AND MEDIUM RECORDED WITH PROGRAM FOR CONTROLLING CENTER SERVER

(57)Abstract:

PROBLEM TO BE SOLVED: To request borrowing on the basis of determined time order by automatically determining a library, which enables fastest lending, when a plurality of lending candidate libraries are present in a mutual lending/borrowing system.

SOLUTION: In response to a borrowing request from a borrowing request library client 21, first of all, a center server 10 retrieves the library, which has the material of the borrowing request. From a total index database 12 and designates the lending candidate library. While referring to a circulation vehicle schedule database 14, the time order capable of lending the material of the borrowing request from the library provided by the retrieval is determined. Afterwards, the lending candidate library and the order of dates capable of lending the desired material from each lending candidate library are reported to the borrowing request library client.

## LEGAL STATUS

[Date of request for examination]

30.03.2006

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
